BASEPRO ENGINEERING LIMITED is a Tanzania-based engineering, industrial development, and EPC-oriented company providing integrated solutions for industrial investors, manufacturers, agribusinesses, logistics operators, mining companies, and developers.

The company specializes in supporting industrial projects from early-stage concept to full implementation. Our work covers industrial land identification, site assessment, surveying, feasibility studies, investment planning, engineering design, procurement support, construction, machinery coordination, industrial energy planning, waste management solutions, commissioning support, and project handover.

BASEPRO was established to respond to the growing demand for reliable industrial infrastructure in Tanzania and East Africa. We help clients transform investment ideas into practical, compliant, and operational facilities by combining engineering expertise, construction capability, project management, and local implementation knowledge.

Our approach is simple: we study the client's industrial vision, convert it into a technically sound development plan, design the required infrastructure, coordinate procurement and construction, and support the project until it is ready for operation.

Dear Clients and Partners,
Welcome to BASEPRO ENGINEERING LIMITED.
We are delighted to welcome you to our company.
As a company that delivers a wide range of construction and industrial services, we are committed to delivering safe, reliable, and high-quality engineering solutions with professionalism, efficiency, and integrity.

Thank you.

Veronica Orbano

Managing Director

Our Vision

To become a benchmark of excellence in the engineering industry by delivering world-class infrastructure and development solutions.

Our Mission

To provide high quality, cost effective and sustainable engineering services through innovation, technical expertise, and a strong client-focused approach.

Our Commitments

BASEPRO is committed to delivering industrial facilities that are functional, durable, safe, cost-effective, and suitable for long-term operations. We work to ensure that every project is technically sound, commercially practical, environmentally responsible, and aligned with the client's investment objectives.

BASEPRO provides end-to-end support for industrial projects, including factories, warehouses, agro-processing plants, workshops, logistics hubs, mining support facilities, industrial parks, packhouses, cold storage facilities, and processing plants.

We work with clients at different project stages, including idea development, land acquisition, feasibility assessment, design, cost estimation, approvals support, construction, equipment installation coordination, and operational readiness.

Industrial Investment Consultancy

We support investors in industrial Land Identification and Acquisition, Title Deed Facilitation, Investment Licensing, Incentive Applications, Regulatory Approvals, Project Documentation and Coordination with Relevant Authorities.

Factory, Warehouse & Processing Plant Design

We provide Architectural, Structural, Civil and MEP Design for Factories, Warehouses, Processing Plants, Storage Facilities, Loading Areas, Machinery Layouts, Production-Flow Planning, and Future Expansion Requirements.

Building & Civil Works Construction

We undertake construction of industrial buildings, factories, warehouses, foundations, floor slabs, drainage systems, access roads, loading bays, yards, utility corridors, platforms, and other related industrial infrastructure.

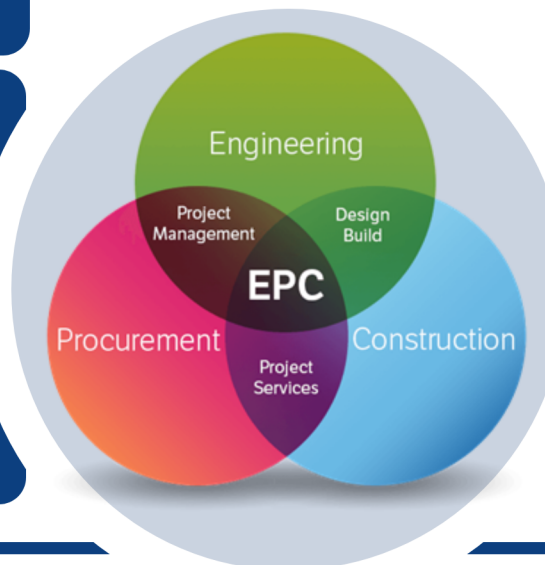

Machinery & Equipment Coordination

We assist clients with Machinery Specification, Supplier Identification, Quotation Review, Importation Coordination, Installation Layout, Machinery Foundation Planning, Testing, Commissioning, and Technical Coordination with Equipment Suppliers.

EPC & Turnkey Project Delivery

We deliver Integrated Engineering, Procurement, Construction, Project Management, Site Supervision, Quality Control, Commissioning Coordination, and Final Handover under one Coordinated Project Delivery Framework.
